LTE BAND 40 DECLARATION

Product Name : ARB LINX

Model No. : 7450502

FCC ID : 2AA2H-LINXD2

This product hardware has the capability to operate on LTE band 40, frequencies 2300-2400MHz. However, in the United States only the frequency band of 2305-2315MHz / 2350-2360MHz is used.

The remainder of the 2300-2400MHz is provided for use with service providers in other countries (e.g., South Africa), and when used with an American telephony provider's SIM card (e.g., AT&T) the device will only access the FCC controlled bands of 2305-2315MHz / 2350-2360MHz.

ARB Corporation Ltd declares that this product will not ship with any SIM card at all and therefore it will be restricted to the FCC controlled portion of the 2300-2400MHz band using any American user's telephony SIM.

Sincerely,

ARB Corporation Ltd
